Associate Professor Sunil Sethi

Associate Professor Sunil Sethi is a Senior Consultant Chemical Pathologist, and the Head of Clinical Chemistry, Department of Laboratory Medicine at the National University Hospital, Singapore and Associate Professor of Pathology at the National University of Singapore. After his basic medical degree, Dr Sethi obtained his specialist qualifications in Internal Medicine and Chemical Pathology from the Royal Colleges of Medicine (MRCP) and Pathologists (FRCPath), UK and a PhD in the area of lipid metabolism, from the University of Surrey, UK. He is the President of the Singapore Association of Clinical Biochemists (SACB) as well as the President and Executive Board Member of the Asian and Pacific Federation for Clinical Biochemistry and Laboratory Medicine (APFCB). Dr Sethi sits on numerous local, regional and international committees and advisory boards. In addition to his administrative and laboratory practice, Dr Sethi is still active in direct patient care and conducts a regular lipid clinic in the hospital. His research interests include streamlining and improving laboratory processes, the use of informatics and support applications for laboratory and clinical purposes.
