APFCB Masterclass in Interpretative Commenting

Topic: Renal Function/ eGFR

1.30pm IN/ 3pm TH/ 4pm SG/ 5pm KR

Due to the difficulties of measuring glomerular filtration rate, estimated glomerular filtration rate (eGFR) is a mainstay of renal assessment. Although creatinine-based eGFR is often used, controversy exists over the best creatinine-based equation, and whether other biomarkers may have better clinical performance. A/Prof. Graham Jones will discuss methods of eGFR assessment, and clinical interpretation of results.

CERTIFICATE OF ATTENDANCE WILL BE AVAILABLE TO ALL PARTICIPANTS

ASIA-PACIFIC FEDERATION FOR CLINICAL BIOCHEMISTRY AND LABORATORY MEDICINE

About the Speaker:

- Graham Jones, MBBS, BSc(med), DPhil, FRCPA, FAACB, is Consultant Chemical Pathologist at St. Vincent's Hospital Sydney, and Conjoint Associate Professor at the University of New South Wales, Sydney, Australia.
- A/Prof. Jones obtained his MBBS and BSc(med) from Sydney University, DPhil from Oxford University, and Fellowships from the Royal College of Pathologists of Australasia and Australasian Association of Clinical Biochemists.
- A/Prof. Jones is an examiner for the RCPA and AACB, and chair or co-chair of committees on eGFR, urine albumin, common reference intervals and the RCPA Quality Assurance program.
- Special interests include laboratory testing for cardiac disease, renal disease and diabetes, as well as the quality of laboratory results and uniform results reporting.
